

## **Annotated bibliography of print resources on developing professional networks.**

Dee, Phil. *Building a Successful Career in Scientific Research: A Guide for PhD Students and Postdocs*, Cambridge University Press, New York: (2006), 140p.

*Chapter 11: Collaboration and Visiting Other Labs*, p. 75-84, discusses why and how to establish research collaborations. Particularly pertinent for students may be the section in the last pages on “networking brought closer to you” about making local laboratory contacts.

Faught, Danny R. “Developing your professional network”, *STQE Magazine*, January/February (2001), p. 72-73.

This article can be downloaded/viewed at

<http://www.tejasconsulting.com/stqe/network.pdf>. The article is from a computing magazine, but is fairly generalizable, short, and includes some hints about communicating via email. References & sums up the much longer Agre paper (in the web resources) a lot, which is specifically about the research environment and the internet.
