

Annotated bibliography of print resources on research ethics.

“Reporting preliminary results (Case B1).” *Teaching the responsible conduct of research through a case study approach.* S.G. Korenman and A.C. Shipp, eds. American Association of Medical Colleges, Washington, D.C.: (1994), 226p.

A case study on submitting an abstract based upon results that are not yet confirmed or replicated. This text may be ordered directly through the American Association of Medical Colleges webpage via the “Publications” link at www.aamc.org.

“Dealing with suspicions of misconduct (Case F2).” *Teaching the responsible conduct of research through a case study approach.* S.G. Korenman and A.C. Shipp, eds. American Association of Medical Colleges, Washington, D.C.: (1994), 226p.

A case study about a person suspecting a fraudulent paper has been published. The case questions have students consider the situation from the perspective of various players. The case is also fairly short. This text may be ordered directly through the American Association of Medical Colleges webpage via the “Publications” link at www.aamc.org.
